Credential Description

This certificate is given to students who successfully graduated from Clarusway BACKEND WITH NODEJS Training after 12 weeks of intensive work.

In this module, the attendants were taught Backend skills and tools by taking a total of 240 hours of actual live lessons, 10+ assignments, 7 projects, 1 real life project, and 1 milestone project, 240 hours of practice, on the most demanding technologies as:

- Develop applications with Node JS by using Express.js Framework running at back-end,
- Design and use a database and integrate this database with APIs and Applications,
- Develop APIs including database support and deploy these APIs to popular servers,
- Handle and ensure accessibility and security compliance such as user authentication and access control for an application working at the back-end,
- Use version control systems, such as Git integrated with Github,
- Create test for API's.
- Develop Real Life web application with NodeJS/Express.js and deploy the app to popular servers
- Next.js (React framework)
- Develop web application with Next.js and deploy the app to popular servers

Students who successfully graduate from this course completed 5 middle-level hands-on Projects, 1 Real Life Projects and 1 milestone Project. They carried out these projects both individually and as a team member.

- Medium-Level Hands-on Project-1: Simple CRUD App
- Medium-Level Hands-on Project-2: ToDo App
- Medium-Level Hands-on Project-3: Personnel App
- Medium-Level Hands-on Project-3: Pizza App
- Medium-Level Hands-on Project-5: Flight App
- Medium-Level Hands-on Project-6: RentACar App
- Medium-Level Hands-on Project-7: Netflix App with
- Advanced-Level Hands-on Project: Stock Management App
- Milestone Project : Blog App (Backend)

They also successfully completed many tough code challenges and assignments in this process. They completed 240+ hours of supervised pre-class and post-class activities. During this course, students used many tools and methods such as: Clarusway LMS (Learning Management System), Mentoring (Group & 1on1),

Workshops, Teamworks, Kahoot, Flip, Peardeck, Zoom, Slack, etc. as well as the skills specified in the certificate.

Fullstack Development Bootcamp prepares individuals for intermediate-level jobs such as:

- Back-End Developer,
- Node.js Developer,
- Express.js Developer.

Skills

Web Deployment	Vscode	Templating	Swagger	Sequelize.js	SQL (Programming Language)	Relational Databases	
RESTful API	Postman	PostgreSQL	Object-Oriented Programming (OOP)		ORM	ODM	NodeJS
Node.js	Mongoose	MongoDB	MVC	JSON Web Token (JWT)	Express.js	Docker	Deployment
Authentications	Redoc	EJS					

Earning Criteria

- Attendance rate of 100%
- Successfully completing the given projects
