Credential Description

This certificate is given to students who successfully graduated from Clarusway FULL STACK DEVELOPMENT Training after 12 months of intensive work. During the course, our students received training in 4 modules.

1. Web Development Module:

In this module, the attendants were taught the basics of IT and Frontend Development by taking a total of 240 hours of actual live lessons, 10+ assignments, 10+ projects, 240 hours of practice, on the most demanding technologies as:

- Computer Fundamentals
- Computational Thinking
- Agile
- Jira
- Linux Essentials
- Source/Version Control Systems (Git / GitHub)
- Collaboration and Communication (Slack, Zoom)
- HTML
- CSS
- SASS
- Bootstrap5
- Responsive Web Design
- Javascript
- Javascript DOM
- Assignments and Small Projects (for each section)
- Design complete web applications and websites
- Use HTML&CSS, Bootstrap, SASS, and other styling UI libraries to style their websites and applications
- Develop web applications and websites with Javascript and deploy these apps and sites to popular servers

2. Frontend with React Module:

In this module, the attendants were taught Frontend skills and tools by taking a total of 240 hours of actual live lessons, 10+ assignments, 10+ projects, 1 real life project, and 1 milestone project, 240 hours of practice, on the most demanding technologies as:

- Design complete web applications and websites
- Use HTML&CSS, Bootstrap, SASS, and other styling UI libraries to style their websites and applications
- Use Styled Component, Material UI, Tailwind CSS, and React Bootstrap UI libraries to style their ReactJS websites and applications
- Use Context API, Redux / Redux Toolkit as a State Management tool in ReactJS Projects
- Use Custom Hooks, Firebase, Postman, REST API in ReactJS Projects
- Develop web applications with ReactJS and deploy these apps to popular servers
- Develop Real Life web application with ReactJS and deploy the app to popular servers
- Develop web applications with Typescript and deploy the app to popular servers
- Handle and ensure accessibility and security compliance such as user authentication and access control for an application working online
- Use version control systems, such as Git integrated with Github

3 . Backend with NodeJS Module:

In this module, the attendants were taught Backend skills and tools by taking a total of 240 hours of actual live lessons, 10+ assignments, 6 projects, and 1 milestone project, 240 hours of practice, on the most demanding Technologies as:

- Develop applications with Node JS by using Express.js Framework running at back-end,
- Design and use a database and integrate this database with APIs and Applications,
- Develop APIs including database support and deploy these APIs to popular servers,
- Handle and ensure accessibility and security compliance such as user authentication and access control for an application working at the back-end,
- Use version control systems, such as Git integrated with Github,
- Create test for API's.
- Develop Real Life web application with NodeJS/Express.js and deploy the app to popular servers
- Next.js (React framework)
- Develop web application with Next.js and deploy the app to popular servers

4. Full Stack Project / Experience Module:

In this module, the attendants developed Full Stack Project as a team. They worked on the project for a total of 480 hours, including all project preparations, researchs, debuggings and writing the codes of the project. While managing this entire process, they were supported by fully experienced consultant instructors.

They used GitHub as a development platform and Jira as a project management tool. They used all the most demanding technologies that they learned in this course. And also, they

- Create BRD (Business Requirements Document) for project
- Create Backlog for project
- Create ERD (Entity Relationship Diagram) for project
- Used GitHub as a development platform
- Used Jira as a project management tool
- Planned project up to Agile, determine tasks for Sprints
- Execute daily meetings every day, sprint planning meetings and delivery meetings
- Develop Real Life web application with ReactJS and deploy the app to popular servers
- Develop Real Life web application with NodeJS/Express.js and deploy the app to popular servers

5. Medium-Level and Capstone Projects:

Students who successfully graduate from this course completed 23 middle-level hands-on Projects, 2 Real Life Projects and 1 Capstone Project. They carried out these projects both individually and as a team member.

- Medium-Level Hands-on Project-1: Home Furnishing Project
- Medium-Level Hands-on Project-2: Clarusway Page with Bootstrap5
- Medium-Level Hands-on Project-3: Portfolio Page with SASS
- Medium-Level Hands-on Project-4: Rock-Paper-Scissors Game
- Medium-Level Hands-on Project-5: IOS Calculator
- Medium-Level Hands-on Project-6: To Do App
- Medium-Level Hands-on Project-7: Checkout Page
- Medium-Level Hands-on Project-8: Weather App
- Medium-Level Hands-on Project-9: Horoscope Page with React
- Medium-Level Hands-on Project-10: NBA Legends App with React
- Medium-Level Hands-on Project-11: Hospital Appointment App with React
- Medium-Level Hands-on Project-12: Shopping Card Project with React
- Medium-Level Hands-on Project-13: Recipe App with React
- Medium-Level Hands-on Project-14: Movie App with React

- Medium-Level Hands-on Project-15: To-Do Project with React Typescript
- Medium-Level Hands-on Project-16: Movie App with Next.js
- Medium-Level Hands-on Project-17: Simple CRUD App
- Medium-Level Hands-on Project-18: To Do App with Node.js / Express.js
- Medium-Level Hands-on Project-19: Pizza App with Node.js / Express.js
- Medium-Level Hands-on Project-20: Flight App with Node.js / Express.js
- Medium-Level Hands-on Project-21: Quiz App with Node.js / Express.js
- Medium-Level Hands-on Project-22: Blog App Web with Node.js / Express.js
- Medium-Level Hands-on Project-23: Blog API

- Advanced-Level Hands-on Project: Stock Management App with React
- Advanced-Level Hands-on Project: Stock Management App with Node.js / Express.js

- Capstone Project : Blog App (Frontend+Backend)

They also successfully completed many tough code challenges and assignments in this process. They completed 960+ hours of supervised pre-class and post-class activities. During this course, students used many tools and methods such as: Clarusway LMS (Learning Management System), Mentoring (Group & 1on1), Workshops, Teamworks, Kahoot, Flip, Peardeck, Zoom, Slack, etc. as well as the skills specified in the certificate.

Fullstack Development Bootcamp prepares individuals for intermediate-level jobs such as:

- Web Developer,
- Front-End Developer,
- Back-End Developer,
- Full-Stack Developer,
- Javascript Developer,
- React developer,
- Node.js Developer,
- Express.js Developer.

Skills

- Zoom
- Web Deployment
- Vscode
- Templating
- Teamwork
- Tailwind CSS
- Swagger
- Slack
- Sequelize.js

SQL (Programming Language)		Responsive Web Design		Relational Databases		Redux / Redux Toolkit		React.js		RESTful API	
REST API		Postman		PostgreSQL		Object-Oriented Programming (OOP)		ORM (Obejct-Relational Mapping)		ORM	
ODM (Object Document Mapping)		NodeJS		Node.js		Next.js		Mongoose (Software)		MongoDB	
Material UI											
MVC		Jira		JSON Web Token (JWT)		Github		Git (Version Control System)		Express.js	
Docker											
Authentications		Agile		Redoc		EJS					

Earning Criteria

- Attendance rate of 100%
- Successfully completing the given projects
